

## What our customers and partners say...

"Above all, a huge thanks to KSMS ApS, led by Kristian Storhamar, for putting their faith in us as subcontractors. Let me say a bit about the KSMS ApS crew—man, they go all out. In all my experience, I've never encountered a group that pushes harder or stays more focused in the field than the entire KSMS ApS team.

Hats off to them!—core drilling in Greenland isn't something just anyone can handle. Appreciate the camp setup, the meals, and all the support and coordination for our efforts on this job."

**- Submara, Norge (LinkedIn 2025)**

"We really want to continue the good cooperation with you."

**- NGI, Norway (2024)**

"Solution-oriented and the best onsite experience we ever had."

**- Geomap Norge AS (2024)**

"The solutions you've come up with are world-class!"

**- Nuna Green AS (2023)**

"It has been a pleasure to work together with you on these projects."

**- NGI, Norway (2023)**

## About KSMS

**KSMS ApS** was established in 2024 by Kristian Stórhamar and Martin Sivertsen, who are highly experienced and specialized in drilling projects in Greenland, Faroe Islands and Norway for clients like NGI, Nukissiorfiit, NunaGreen, NCC, FMI, SEV, Effo, Magn, Føroya Tele, Faroese Geological Survey, Landsverk and more.

**KS** is a brazen and outspoken "Suðringur", - with a soft heart.  
**MS** is a though, born and raised "Greenlander", - with a meek spirit.

In all our drilling projects and services, we are committed to include **everything**, so that our clients will have **peace of mind!**

### Why Choose Us?

- **All Inclusive Projects**
- **Proven Expertise**
- **Highly Flexible Solutions**
- **Commitment to Quality**
- **Caring for the Environment**
- **Clear Communication**

## Our Approach:

### Caring

We deeply respect our clients' social license to operate and are committed to minimizing the impact of drilling activities. Our goal is to ensure that local stakeholders feel as positive, if not more so, after drilling as they did beforehand.

### Communication

We prioritize open dialogue, believing that transparent communication is essential for building trust and sustaining strong relationships with stakeholders. Throughout the drilling process, we maintain continuous communication between clients and operators, ensuring everything from detailed core analysis to progress updates is readily accessible.

### Skillful

As an experienced team we are well-equipped to design safe, cost-efficient and purpose-driven drilling campaigns in collaboration with geologists, supervisors, specialists. With our continuously evolving HSEQ system, we proactively identify challenges and implement risk mitigation strategies procedures.

### Competence

We have successfully executed a wide range of drill campaigns e.g. directional drilling with precise deviation targets, deep drilling, triple tube operations, and heli-portable campaigns with minimal environmental impact. While we are ready for any challenge, we prioritize a thoughtful and responsible approach to every project.

### Competitive

We are committed to delivering high-quality services at a fair price. We recognize that each drill campaign is unique. Reach out to us and we'll tailor the right set of services to suit your project.
